CARE AND CLEANING

SILGRANIT II® SINK

GENERAL CARE & CLEANING:

Daily cleaning may be done with any non-abrasive cleaner (i.e. Bar keeper's friend, Soft Scrub with Bleach, or dishwasher soap). After every use, rinse and wipe the sink dry with a clean, soft cloth to eliminate any water spots or soap film build-ups.

REMOVING STAINS AND MINOR SCUFF MARKS:

Normal Stains ~ for stains, please use a mild abrasive cleanser, along with a soft scouring pad. Stubborn Stains ~ A solution of 50% bleach, 50% water should only be used for tough, stubborn stains. Let the solution sit in the bottom of the sink for one hour; then scrub. Rinse well. Also, the use of BAR KEEPERS FRIEND (directions included on bottle or can) will help remove stubborn stains. (NOTE: with Anthracite or Café Brown, sink must be rinsed thoroughly with hot water).

LUSTER:

BLANCOCLEAN can be used to help bring back the luster. Follow the directions on the bottle. Mineral oil applied with a damp cloth can also be used to restore the luster. We do not recommend using BLANCO CLEAN on dark colored Silgranit II sinks.

MISCELLANEOUS:

To remove Calcium Deposits (a white ring around the bottom of your sink): use LIME AWAY or CLR cleaner To remove Adhesive Labels: use Acetone (nail polish remover)
Note: Always test any stain removers in a small, non-visible location

WHAT NOT TO USE:

1) Do not use any abrasive cleaning agents or scrub pads, such as Steel wool
2) Straight bleach
3) Commercial alkalis, such as ammonia and/or caustic solutions
4) Drain blocking chemicals that involve filling the sink with water
5) BLANCOCLEAN is not recommended for use on dark-colored SILGRANIT II sinks.

Note: Always test any stain removers in a small, non-visible location
